

Building a Vision for the Future

Facilities Committee Reaches Consensus on a Recommendation to the Boquet Valley Board of Education

Recommendation to be Presented at Next Board Meeting

On March 27, 2025, the Boquet Valley Central School District Facilities Committee held its sixth meeting. Facilitator Joe Dragone from Capital Region BOCES guided the committee in reviewing the timeline, the proposed room utilization and the proposed scope of Building Condition Survey (BCS) renovations. The Facilities Committee came to a consensus on the development of a recommendation to the Boquet Valley Board of Education.

April Board of Education Meeting

Recommendation to the Board

The Facilities Committee approved the following recommendation to be made to the Board of Education:

1. The Committee recommends that The Thrall Dam site should not be considered as a site for any future facility needs, and further, no viable property options currently exist for a new school site;
 2. The Committee recommends new construction and renovations at the Mountain View Campus to accommodate the PK-12 academic program;
 3. The Committee recommends that Lake View Campus not be used for the transportation facility or the athletic fields;
 4. The Committee recommends further collaboration and partnership with Camp Dudley as the recommended location for athletic fields;
 5. The Committee recommends continuing to evaluate suitable properties for the construction of a new transportation facility.
- Further, after an extensive review of the potential financial implications that construction and renovation will have on the school community, the Committee recommends that all construction and renovations at the Mountain View Campus consider the Maximum Cost Allowance to maximize aidable expenses.
 - Although the committee understands that the Maximum Cost Allowance will be exceeded based on the scale of necessary renovations, the Committee recommends every effort to balance the scope of the project with local tax impact.
